

Supplementary Figure 1. The Kaplan-Meier failure graph of postoperative ADT on continence recovery.

The Kaplan-Meier failure graph demonstrates subgroup analysis of the effect of postoperative ADT on continence recovery. (A) In the ADT subgroup, postoperative ADT did not affect continence recovery (Log rank $p=0.232$). (B) In the ADT +Docetaxel subgroup, postoperative ADT delayed continence recovery (Log rank $p=0.005^{**}$). (C) In ADT+Abiraterone subgroup, postoperative ADT did not affect continence recovery (Log rank $p=0.805$).
