2 Material and Methods

Study exclusion criteria:

- stage D chronic heart failure;
- acute heart failure;
- myocardial infarction;
- permanent atrial fibrillation;
- stroke within 6 months;
- severe uncontrolled hypertension;
- significant valvular heart disease;
- active cancer or systemic autoimmune pathology;
- inability to provide an informed consent;
- persisting O2 supplementation dependence by the time of discharge.

3 Results

The source file of the final machine learning classification model is available in open access at <https://doi.org/10.5281/zenodo.7861928> and requires an input dataset with the following variables:

- Age = age (years);
- ESR = erythrocyte sedimentation rate (mm/h);
- Tx-O2 = oxygen supplementation during treatment (2=Yes, 1=No);
- HT = history of hypertension (2=Yes, 1=No).

The output codes for predicted recovery pattern include “Good” for good/satisfactory recovery, “Bad” for poor recovery.

Supplementary Tables

Supplementary table 1. Baseline marginal analysis of potential predictors in multivariate logistic regression analysis (poor outcome = Cluster 4 assignment).

Effect	Cluster 4 vs 1,2,3 – Marginal table					
	Level	Somers' D	Estimate	Pr>Chi.Sqr	df	Sample

History of hypertension	1	0,22869	0,520726937	0,0454691598	1	Full

Note. * Assessment was performed using the methodology for the simplified RALE score as proposed by Wong et al. [1], mean value of the reported % range was taken for analysis. ESR – erythrocyte sedimentation rate, eGFR – estimated glomerular filtration rate by CKD-EPI equation, CT – computed tomography, SpO2 – capillary blood oxygen saturation, Tx – treatment.

Supplementary table 2. Parameters of logistic regression models predicting poor functional recovery after hospitalization for COVID-19.

Effect	Estimate	Standard Error	Wald Stat.	Lower CL 95,0%	Upper CL 95,0%	p
Model A (Somers' D = 0,900, Kolmogorov-Smirnov statistic = 0,833, AUC in ROC analysis = 0,95)						
Intercept	-9,61341	5,491331	3,064779	-20,3762	1,149406	0,080006
Age, years	-0,18330	0,075803	5,847117	-0,3319	-0,034727	0,015603
ESR, mm	0,26644	0,107368	6,157969	0,0560	0,476875	0,013082
