

Case 1

Specimen type: granulation

Test result

Pathogenic microor: *Aspergillus flavus/Aspergillus oryzae*, *Lymphocryptovirus* (human herpesvirus type 4 (EB virus))

Probable normal flora: *Acinetobacter jeunei*, *Propionibacterium acnes*, *Moraxella Oslo*, *Escherichia coli*, *Actinobacteria Neisseria*, *Staphylococcus epidermidis*

Genus	relative abundance %
<i>Acinetobacter</i>	24.47
<i>Cutibacterium</i>	4.25
<i>Moraxella</i>	1.72
<i>Escherichia</i>	0.47
<i>Actinomyces</i>	0.14
<i>Staphylococcus</i>	0.12
<i>Stenotrophomonas</i>	0.01
<i>Aspergillus</i>	14.11
<i>Lymphocryptovirus</i>	0.8

Case 2

Specimen type: granulation and secretion

Test result

Pathogenic microor: Aspergillus flavus/Aspergillus oryzae, Staphylococcus aureus

Probable normal flora: Veillonella parvula

Genus	relative abundance %
<i>Veillonella</i>	0.04
<i>Aspergillus</i>	32.51
<i>Staphylococcus</i>	54.22
