

**Autimmune diagnostics from CSF**

|   |          |
|---|----------|
| <b>Glutamate decarboxylase-antibodies</b>                 | negative |
| <b>Hu-antibodies</b>                                      | negative |
| <b>Amphiphysin antibodies</b>                             | negative |
| <b>CV2 antibodies</b>                                     | negative |
| <b>Ma2/Ta antibodies</b>                                  | negative |
| <b>GABA receptor-antibodies</b>                           | negative |
| <b>AMPA receptor antibodies</b>                           | negative |
| <b>NMDA receptor antibodies</b>                           | negative |
| <b>Dipeptidylaminopeptidase-like-protein 6-antibodies</b> | negative |

**Immunology diagnostics from serum**

|                          |                        |
|--------------------------|------------------------|
| <b>C3 complement</b>     | 1.120 g/l, (0.9 - 1.6) |
| <b>C4 complement</b>     | 0.360 g/l, (0.1 - 0.4) |
| <b>ds DNA antibodies</b> | <10 IE/ml, (- <100)    |
| <b>ANA</b>               | negative               |
| <b>ANCA</b>              | negative               |
| <b>p-ANCA</b>            | negative               |
