Table S2. Manova model 1 summary (Response variables ~ N.fertilisation*P.fertilisation, n= 219).

Model term	Wilks λ	F statistic	df1	df2	p
N fertilisation	0.22	127.16	6	209	< 0.001
P fertilisation	0.26	99.01	6	209	< 0.001
NxP interaction	0.42	48.63	6	209	< 0.001

Table S3. Summary of the individual Anova analyses of each response variable from Manova model 1 (Response variable ~ N.fertilisation*P.fertilisation).

Response variable	Plant tissue	N fertilisation		P fertilisation		NxP interaction	
		F statistic	p	F statistic	p	F statistic	p
Total biomass (g)	root	63.75	< 0.001	188.04	< 0.001	94.73	< 0.001
Total C (mmol)	shoot	227.79	< 0.001	568.59	< 0.001	209.1	< 0.001
Total N (mmol)	root	83.66	< 0.001	253.63	< 0.001	129.14	< 0.001
	shoot	226.41	< 0.001	580.35	< 0.001	231.11	< 0.001
	shoot	280.54	< 0.001	128.2	< 0.001	142.75	< 0.001
	shoot	335.2	< 0.001	105.9	< 0.001	72.66	< 0.001

Table S4. Manova summary from model 2 (Response variables ~ log₁₀(N:P ratio)*P.fertilisation, n= 219).

Model term	Wilks λ	F statistic	df1	df2	p
Log ₁₀ (N:P)	0.41	33.62	6	143	< 0.001
P fertilisation	0.15	140.04	6	143	< 0.001
Log ₁₀ (N:P)*P interaction	0.29	57.29	6	143	< 0.001

Table S5. Summary of Anova analyses for each response variable of Manova model 2 (Response variables ~ log10(N:P ratio)*P.fertilisation).

Response variable	Plant tissue	Model term						
		N fertilisation		P fertilisation		NxP interaction		
		F statistic	p	F statistic	p	F statistic	p	
Total biomass	Root		<		<		<	
	Shoot	16.72	0.001	110.09	0.001	83.85	0.001	
Total C (µmol)	Root		<		<		<	
	Shoot	25.53	0.001	169.45	0.001	130.98	0.001	
Total N (µmol)	Root		<		<		<	
	Shoot	74.38	0.001	639.18	0.001	269.35	0.001	
	Root		5.62	0.02	168.6	0.001	112.89	0.001
	Shoot		<		<		<	
		18.81	0.001	213.53	0.001	81.8	0.001	

Table S6. Statistics of linear models giving slope (α) shown in Fig 3 for biomass, total C, total N in roots and shoots for each P fertilisation level (Linear model: Response variable ~ $\log_{10}(N:P)$).

Response variable	Tissue	P fertilisation (mmol)	Slope (α)	Standard error	T statistic	p
Biomass	Shoot	0.0625	-0.025	0.019	-1.283	0.21
		0.125	-0.004	0.034	-0.129	0.898

		0.5	0.254	0.034	7.572	< 0.001

Table S7. Manova summary from model 3 (Shoot:root ratio (SR) of response variables ~ N.fertilisation*P.fertilisation, n=219).

Model term	Wilks λ	F stat	df1	df2	p
N fertilisation	0.77	20.84	3	212	< 0.001
P fertilisation	0.68	34.01	3	212	< 0.001
NxP interaction	0.95	3.58	3	212	0.015

Table S8. Summary of Anova analyses for each response variable of Manova model 3 (shoot:root ratio (SR) of response variables ~ N.fertilisation*P.fertilisation)

Response variable	N fertilisation		P fertilisation		NxP interaction	
	F statistic	p	F statistic	p	F statistic	p
SR-total		<		<		
biomass (g)	36.82	0.001	52.02	0.001	0.41	ns
SR-total C (mmol)	42.55	0.001	73.71	0.001	2.17	ns
SR-total N (mmol)	53.58	0.001	0.01	ns	2.7	ns

Table S9. Manova summary for each response variable (nitrogen-use efficiency (NUE) and phosphorus-use efficiency (PUE) in shoots and roots, i.e., Shoot-NUE, Shoot-PUE, Root-NUE and Root-PUE) of model 4 (Response variables ~ N.fertilisation*P.fertilisation, n=219).

Model term	df	Wilks λ	F statistic	df1	df2	p
N fertilisation	1	0.23	121.2	4	147	< 0.001
P fertilisation	1	0.21	136.15	4	147	< 0.001
NxP interaction	1	0.82	8.11	4	147	< 0.001

Table S10. Summary of Anova analyses for each response variable (nitrogen-use efficiency (NUE) and phosphorus-use efficiency (PUE) in shoots and roots) of Manova model 4 (Response variables ~ N.fertilisation*P.fertilisation).

Tissue	Nutrient-use efficiency	N fertilisation		P fertilisation		NxP interaction	
		F statistic	p	F statistic	p	F statistic	p
Root	NUE	191.61	< 0.001	15.17	< 0.001	0.01	ns
	PUE	2.12	ns	248.55	< 0.001	23.13	< 0.001
Shoot	NUE	428.62	< 0.001	94.28	< 0.001	2.22	ns
	PUE	31.93	< 0.001	412.16	< 0.001	23.86	< 0.001

Table S11. Min, max and range of N:P ratio values for each P fertilisation level (P > 0).

P fertilisation (mmol)	N:P min	N:P max	Range
0.0625	15	120	105
0.125	7.5	60	52.5
0.25	3.75	30	26.25
0.375	2.5	20	17.5
0.5	1.875	15	13.125
