

## Supplementary Figure 1

Survival curves using Kaplan–Meier analysis after propensity score matching. Kaplan–Meier estimates of progression free survival for body composition in patients with EOC treated with Olaparib. A: NLR change; B: PLR change; C: SATI change; D: VATI change; E: SMI change; F: BMD change. NLR, neutrophil-to-lymphocyte ratio; PLR, platelet-to-lymphocyte ratio; SATI, subcutaneous adipose tissue index; VATI, visceral adipose tissue index; SMI, skeletal muscle area index; BMD, bone mineral density.
