Supplemental Figure 2. Change in blood lipid levels over time after SGLT-2 inhibitors treatment: a Low density lipoprotein cholesterol (LDL-C), b Triglyceride(TG), c Total cholesterol(TC), and d High density lipoprotein cholesterol (HDL-C). Means of change were plotted with standard error of mean. The bottom tables present the number observations available at each time point. \*, representing the  $p < 0.05$  in the time point and baseline by paired sample test.
