Additional Comments (If any)

Item 2: KWL Charts are only one way to assess students. Specifying a specific assessment method is out of place within the context of the other questions asked in this section. None of the others ask about the use of a specific method, they ask about a range of approaches, and I'm not sure why KWL Charts are referred to individually as they do not derive from DI in the way that cubing might. I would suggest making the question more inclusive and broad - allowing respondents to identify a range of different pre-test methods they might use. Listing a single approach is limiting. Items 4 & 7 - could be re-worded to assist with clarity.

Additional Comments (If any)

Item 11: Should it be "concepts" or "content"?
 Item 15, 16 & 17 - there is a lot of overlap with these items and the construct of "Process" in DI. For me, these are more related to "Process" not "Content".

Additional Comments (If any)

Item 10: Jigsaw could be better described to include the correct critical attributes: "a cooperative learning strategy where students meet in expert groups to learn content and return to their home group to share it".

Item 14: I would clarify in this item that cubing usually involves the use of a physical cube. The kinaesthetic aspect of cubing is an important aspect in DI in terms of catering for the needs of kinaesthetic learners

Instruction: Please rate item 37 as a whole.

Additional Comments (If any)

Item 40: Consider adding "peers/colleagues" - other teachers are a great source of support for sharing ideas and practices. It would be good to capture this. Also, perhaps consider adding "websites" - this is another common source of information teachers use to support the implementation of instructional practice.

Thank you for taking the time to validate the survey questionnaire. I sincerely appreciate your time, effort, and constructive comments and suggestions.
