Additional Comments (If any)

- 1: Many educators pre-assess before the beginning of a unit of work to plan instruction/activities; change *and plan instruction/ activity to TO plan instruction/activity*. otherwise two pronged question
- 2: rationale for this question re the KWL? this is just one strategy we can use for pre-assessment. Also are you eliciting information re individual student KUDs or the class?

Additional Comments (If any) Consistency in language - switching between learners and students

9: abilities or readiness levels?

10: clarity in wording ... *textbooks, to let students access* should be changed to *enable students to access*

11: grammar - whole-to-part approaches *to convey* key concepts...

13: trouble with the use of learning styles in this question

17: Manipulative - my understanding is these are made *available* to all students to use if the choose to support their own learning

Additional Comments (If any)

29: Is the intention to steer participants towards certain answers e.g. limiting the question to 'menu of option' rather than ... I give students *choice in how they demonstrate their master of the learning objectives*

30: What is the intention here? do you want the elicit that participants offer differentiated assignments towards the same Learning Objectives or just that they offer different levels of assignments?

35: creative thinking is the production of new ideas etc. This could be shortened
