### **1 Scale Items**

(Options: 1 = strongly disagree, 2 = disagree, 3 = somewhat disagree, 4 = somewhat agree, 5 = agree, 6 = strongly agree)

#### **1.1 Stereotype Content Model (SCM)**

- Competence

Q1. 38/68-year-old *target* individuals are competent.

Q2. 38/68-year-old *target* individuals are superior.

Q3. 38/68-year-old *target* individuals are intelligent.

- Warmth

Q1. 38/68-year-old *target* individuals are kind.

Q2. 38/68-year-old *target* individuals are friendly.

Q3. 38/68-year-old *target* individuals are warm-hearted.

#### **1.2 Predictors**

- Position

Q1. 38/68-year-old *target* individuals have money and resources.

Q2. 38/68-year-old *target* individuals have a high position in society.

Q3. 38/68-year-old *target* individuals have a high education level.

- Respect

Q1. 38/68-year-old *target* individuals are respected.

Q2. 38/68-year-old *target* individuals are esteemed.

Q3. 38/68-year-old *target* individuals are an example for others.

- Competition

Q1. Cooperating with 38/68-year-old *target* individuals to achieve a common goal.

Q2. Relying on 38/68-year-old *target* individuals to achieve an important goal.

Q3. The more power 38/68-year-old *target* individuals have, the less power others are likely to have.

Q4. Resources that go to 38/68-year-old *target* individuals are likely to take away from the resources of others.

*Note.* In the experiment, instead of the word *target*, the assigned occupation was presented to the participants
