

OTU I

Contig 120m free NODE 66471

OTU III

Contig 300m NODE 951834

OTU II

Contig 120m NODE 1615672

Contig 180m NODE 268515

Contig 120m particle NODE 328294

Contig 120m particle NODE 148559 (backwards)

Contig 180m particle NODE 571549

Figure S11. Schematic of selected contigs containing *q-norB*-like genes. Hypothetical proteins are shown in gray. Proteins related to N cycling are shown in red. Contigs are clustered by the phylogenetic affiliation of their *q-norB* gene.
