

Supplementary Figure 4. OPC-specific markers at early, middle, and late passage. Consistent morphology. Consistent morphology of OPCs at early (P3), middle (P13), and late (P23) passage. DINS derived OPC can maintain steady morphology despite increase in passage. Immunofluorescence images of OPCs stained with OPC specific markers (A2B5 and NG2) at early and late passage. Cells were counterstained with DAPI. Scale bar: 500 μ m.
