

Supplementary Figure 5. Patch-clamp analysis of DNSCs and DN-OPCs. Outward K⁺ (K_v) currents in DNSCs and the response to 4-AP (left). K_v currents in DN-OPCs and the response to 4-AP (right). Current-voltage relationships of peak and steady current before and after application of 4-AP. Data are presented as means $\pm$ SEM ($n = 3$). ** $p < 0.001$.
