

Table 4
Significance Level, Odds Ratios and 95% Confidence Intervals (CI) for Predictors of Non-response

Predictor (<i>reference</i>)	<i>p</i>	OR	Lower CI	Upper CI
Symptom severity at baseline (<i>lower severity</i>)	<.001	2.04	1.53	2.72
Diagnosis, anxiety disorders (<i>depression and other</i>)	<.001	5.75	2.92	11.32
Module completion (<i>fewer</i>)	.12	1.09	0.98	1.22
Civil status (<i>single</i>)	.13	0.66	0.39	1.13
Gender (<i>female</i>)	.03	1.80	1.05	3.10
Previous psychological treatment (<i>no</i>)	.99	1.01	0.57	1.77
Previous or ongoing psychotropic medication (<i>no</i>)	.08	1.72	0.94	3.14
Sick leave (<i>no</i>)	.51	0.54	0.08	3.45
Educational level (<i>below university level</i>)	.49	1.20	0.71	2.04
Age (<i>lower age</i>)	.73	1.00	0.98	1.02

p = *p*-value; OR = Odds Ratio; CI = 95% Confidence Interval
