

Supplementary Material

Supplemental Figure 1

Supplementary Figure 1. Wild type controls (Wt) and transgenic (Tg) tissues were stained for V5-DAB. Spinal cords from Wt control have no expression of V5-PFN1^{C71G} (A-E). Cells in the anterior horn of the spinal cord in Tg P0 pups show limited V5-PFN1^{C71G} expression (F, Arrow, and zoomed area F'). There is no V5-PFN1^{C71G} expression in the spinal cords of adult Tg mice (G-J).
