

Table S1. Quadratic model coefficient of determination ( $r^2$ ), correlation coefficients a, b, and c for crop N, grain N yield, grain protein concentration, and response to N supply of all genotypes in each site-year shown in Figures 1 and 2. Coefficient significance:  ${}^t P \leq 0.1$ ,  ${}^* P \leq 0.05$ ,  ${}^{**} P \leq 0.01$  of committing type I error.

Model fit	Quadratic Coefficients
