**Figure S5. real time qPCR validation of RNA-seq data in DAP^R vs DAP^S *S.aureus* parents**

Legend:

● = a value of 10 Fold Changes (FC) (up-regulation) or -10 (down regulation) were indicated for incalculable FC due to the presence of a 0 value reads in one of the strains

† = q-value ≤ 0.01 according to the Rockhopper guidelines.

* = p-value ≤ 0.05 Statistical expression analyses were performed using the relative expression software tool 2009 (REST2009).
