Interview guide: victim of TA-CSA

Introduction/orientation

Before starting the interview, I will tell you a bit about how this will go about. I have some questions for you, both about you as a person, about what you have been through, how you feel today, and how you have felt earlier in life. The idea is that I want to hear *your* story and *your* experiences and feelings. There are no right or wrong answers. Sometimes I might repeat a question or ask you to elaborate on or talk more about something you mention. If there is any question that you do not want to answer – that is okay. It is also okay if you feel like you want to end the interview at any time.

We will talk for about an hour, and I will audio record our talk. The reason for audio recording is so that I do not miss or forget what we are saying here today. No one except my colleagues and me will listen to the recording.

Do you have any questions for me before we start?
