Supplementary Table 8: Multivariable logistic regression analysis for in-hospital mortality and 3-month mortality in patients with anterior circulation stroke

NIHSS, National Institutes of Health Stroke Scale; pmRS, premorbid modified Rankin Scale; eGFR, estimated glomerular filtration rate (mL/min/1.73 m²); PC-AKI, post-contrast-AKI, TICI, Thrombolysis In Cerebral Infarction; sICH, symptomatic intracerebral hemorrhage. P-values ≤0.5 are displayed in bold.
