* $p < 0.05$, ** $p < 0.01$. Abbreviations: Relationship Adjustment (ADAS; Sharpley & Rogers, 1984; Köppe, 2001) scores range from 0 to 5 with higher scores indicating more relationship satisfaction. Communication (Kroegeer et al., 2000; Christensen & Sullaway, 1984) scores range from 1 to 9 with higher scores indicating better couple communication. Higher child internalizing and externalizing symptoms (CBCL 1 1/2–5 and CBCL 4–18) indicate more problems. T1 = baseline, T2 = 6 months, T3 = 1-year, T4 = 2-year, T5 = 3-year, T6 = 4-year and T6 = 10-year-follow-up.
