

Supplementary materials

SPIDER-NET

Case 1

Case 2

CIRCOS

Supplementary Figure 1. Sub-network connectograms generated with SPIDER-NET (upper panel) and with Circos software (<http://circos.ca/>) (lower panel). Case 1 connectograms are shown on the left, Case 2 connectograms are shown on the right. The following regions of interest were considered as seeds: right precentral gyrus, right long insular gyrus and central insular sulcus, right short insular gyri, right caudate nucleus, right pallidum, right putamen, and right thalamus.

Legend: L-left hemisphere, R-right hemisphere, Fro-frontal, Ins-insular, Tem-temporal, Par-parietal, Occ-occipital, Sbc-subcortical, CeB-cerebellum, Bst-brainstem. Brain parcels are reported with standard labels provided for the Destrieux atlas.
