

Supplementary Data

Supp Figure 1: Proteomic analysis of ChipEXO. A) Venn diagram of convalescent ChipEXO obtained from four different individuals, B) Regina graph of ChipEXO, C) Regina demonstration of ChipEXO, and D) STRING relation scheme of pooled ChipEXO proteins.

Proteomic analysis of convalescent plasma exosomes revealed total 844 unique proteins. 23 of these proteins were shared between the four samples (Supp Fig 1.A). ChipEXO proteins were enriched in GO terms associated with the immune response and clotting (Supp Fig 1.B, C). String analysis of ChipEXO proteins were also performed to show the interactions between different proteins of the proteome (Supp Fig 1.D).

Supp Figure 2: Hypothetic mechanism of convalescent human immune plasma derived exosomes. ChipEXO cargo; showed products involved in 4 main pathways with functional continuum against Covid-19 infection.

Supplementary Table 1: Concentration and size measurements of ChipEXO with 10 technical and 4 biological replicates. SD: Standard deviation, CI: Confidence Interval, LL: Lower Limit, UL: Upper Limit
