

Supplementary Figure 1

A

B

The distribution of confidence value of interactions in HIPPIE.
HIPPIE calculated the confidence value (X-axis) of each interaction based on the publications and techniques used, etc. The blue dotted line refers to the medium confidence value 0.63 suggested by HIPPIE.
A) Confidence value of protein-proteins interactions derived from HIPPIE in the global PPIN.
B) Confidence value of protein-proteins interactions from HIPPIE in BRD PPIN.
