

Supplementary Figure 2. The changed accumulation of 25-26 nt sRNAs and associated transcripts in mutants *PpAGO3^{ΔRGG1}* and *PpAGO3^{ΔRGG3}* is negatively correlated. **(A)** Heatmap for the expression of 25-26 nt sRNAs and associated transcripts of 509 non-cytoplasmic effector genes in the wild-type, and mutants *PpAGO3^{ΔRGG1}* and *PpAGO3^{ΔRGG3}*. **(B-C)** The histogram represents expression of 25-26 nt sRNAs and associated transcripts of three INF-like genes (*PPTG_09074*, *PPTG_09075* and *PPTG_19861*).
