<sup>1</sup>Perceived stress: Perceived Stress Scores (PSS) ranging from 0-13, 14-26 and 25-40 points were considered low, moderate and high perceived stress, respectively (Cohen et al., 1983).

<sup>2</sup>Perceived postnatal depression: Edinburgh Postnatal Depression Scale (EPDS) scores equal to 10 or above were considered indicative of postnatal depression (Cox et al., 1987; Wisner et al., 2002).
