

Supplementary Fig. 1 Effect of the amount of silica gel on lipid recovery. Open bars, the recovery of lipid extracted by the Röse-Gottlieb method (RG); striped bars, recovery by solid phase extraction. The recovery was expressed relative to the lipid content displayed on the product labels, except goat milk. The lipid content in goat milk was determined as described in Materials and Method section 2.4. A, Goat milk (lipid content, 2.8%), B, high fat cow milk (4.3%), C, liquid infant formula (3.8%), D, cream from cow milk (47%).
