Article Database Search Methodology and Strategy Report	12

Table S2-1. Tabulation of Studies assessed, eligible and treatment cohorts analysed

Articles Assessed	Eligible Articles			Study Cohorts			Treatments			
	Women	Men	Total	Women	Men	Total	Women	Men	Total	
Sex	98 ^a	10	8	17	12	13	25	5	7	8
Women	48	10	-	10	12	-	12	5	-	5
Men	69	-	8	8	-	13	13	-	7	7

Notes: a: Articles add up to less than total of Men and Women due combined sex enrolments in some studies and common treatments.

Table S2-2. Table of Inclusion/Exclusion Reason Codes

Reason Codes

- 1 Eligible
- 2 Not outcome of interest
- 3 Experimental formulation/treatment
- 4 Not randomized placebo-controlled trial
- 5 Insufficient subjects
- 6 Not Androgenetic Alopecia or patterned hair loss
- 7 No extractable data
- 8 No error data at 24 weeks
- 9 Data included in subsequent publication
- 10 Results or crossover < 24 weeks
- 11 Ineligible hair count methods
- 12 No sex specific data
- 13 Not English or German
- 14 Article not retrievable
- 15 Total Hair Only
- 16 Duplicate

Table S2-3. Summary of Primary Reasons for Inclusion/Exclusion by Treatment

Treatment	Eligible	Excluded by Reason Code												Total	
		2	3	4	5	6	7	9	10	11	12	14	15

Article Database Search Methodology and Strategy Report

Search Methodology:

Alopecia standard of care treatments safety and efficacy - RCTs

Methods section (suggested text for journal article)

A professional librarian (EU) ran a search in the MEDLINE, Medline-in-Process, Medline ePub Ahead of Print and EMBASE databases(OvidSP); and Cochrane (Wiley) on August 11, 2021. We used both subject headings and textword terms to search for articles on Alopecia AND current standard of care replacement therapies (e.g.minoxidil or finasteride or duasteride or biotin or low level laser light therapy or supplements or or transplant, etc.) AND Randomized Clinical Trials. The search results were not limited to publication date or language.

We retrieved a total of **3153** references. All references were saved in an EndNote library used to identify the **843** duplicates. The remaining **2310 + 3** hand searches + **1** grey search unique references were reviewed against our inclusion criteria. The complete search strategies are listed in below.
