Two new species of Echinoderes (Kinorhyncha: Cyclorhagida) from the Gulf of Mexico
by Sørensen, M. V., and Landers, S. C. (2014). *Front. Mar. Sci.* 1:8. doi: 10.3389/fmars.2014.00008

Sørensen and Landers (2014) recently described the two kinorhynch species *Echinoderes augustae* and *E. skipperae*. In order to ensure validity of the two new species, and to follow the rules of the ICZN regarding new species described in electronic publications, the species were subsequently registered in Zoobank (www.zoobank.org), and the publication (Sørensen and Landers, 2014) was added to Zoobank under LSID number urn:lsid:zoobank.org:pub:054F74AE-74F5-4D9F-8E02-373A55471760.

Acknowledgments

This research was made possible by a grant from BP/The Gulf of Mexico Research Initiative.
