KEYWORDS

iPSCs, beta cells, differentiation, extracellular vesicles, miRNAs

A Corrigendum on

[miR-212/132-enriched extracellular vesicles promote differentiation of induced pluripotent stem cells into pancreatic beta cells](#)

by Bai C, Ren Q, Liu H, Li X, Guan W and Gao Y (2021). *Front. Cell Dev. Biol.* 9:673231. doi: [10.3389/fcell.2021.673231](#)

In the published article, there was an error in [Figure 2](#) as published. The image of i-Beta cells was lost. The corrected [Figure 2](#) appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

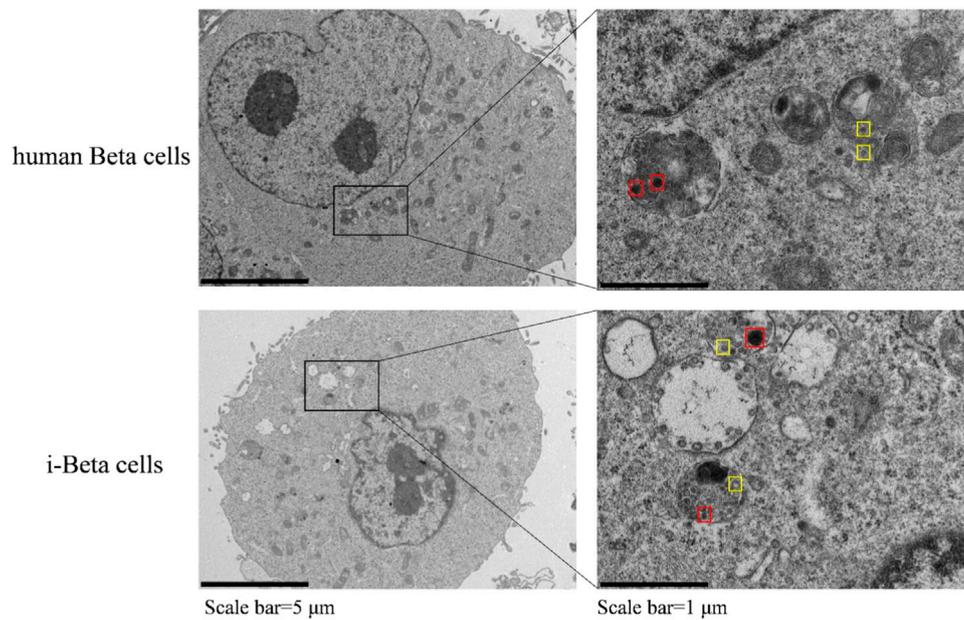

FIGURE 2

Electron microscopy of granules in sectioned cells with representative crystallized insulin granules (red) and early insulin granules (yellow) in human beta cells and i-Beta cells. Left panel shows electron microscopy images of granules in human beta cells (top image) and i-Beta cells (bottom image). Right panel shows a box and whisker plot of the number of insulin granules per cell ($n = 20$, Scale bar = 1 μm).
