mitochondrial-derived vesicles, myocardial ischemia, mitochondrial, hypoxia, apoptosis

A Corrigendum on

Mitochondrial-derived vesicles protect cardiomyocytes against hypoxic damage

by Li B, Zhao H, Wu Y, Zhu Y, Zhang J, Yang G, Yan Q, Li J, Li T and Liu L (2020). *Front. Cell Dev. Biol.* 8:214. doi: 10.3389/fcell.2020.00214

In the published article, there was an error in [Figure 6](#) as published. There was an error in pasting the figure of DAPI of the ischemia group in [Figure 6B](#). The corrected [Figure 6](#) and its caption “Effect of exogenous MDVs on myocardial injury in general ischemic animals. (A) Transmission electron microscopy images of the heart tissues from the general ischemic rats. (B and C) TUNEL staining of the cardiac tissues (n = 3); P values were estimated by one-way ANOVA with Bonferroni’s post-hoc test; *P < 0.05 versus control, # P < 0.05 versus ischemia. (D–F) Statistical histogram of TnT, LDH, and CK-MB levels in each group (n = 6 per group); P values were estimated by one-way ANOVA with Bonferroni’s post-hoc test; *P < 0.05 versus control.” appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
