transmission, barriers, arbovirus, antiviral immunity, microbiome, genomics, applications

A Corrigendum on

Intrinsic factors driving mosquito vector competence and viral evolution: a review

By Lewis J, Gallichotte EN, Randall J, Glass A, Foy BD, Ebel GD and Kading RC (2023) *Front. Cell. Infect. Microbiol.* 13:1330600. doi: 10.3389/fcimb.2023.1330600

In the published article, there was an error in the Funding statement. Part of the funding statement that included an NSF grant number was left out of the published article. The correct Funding statement appears below.

FUNDING

The author(s) declare financial support was received for the research, authorship, and/or publication of this article. RCK, and JL are receiving salary support from the United States Department of Agriculture, Agriculture Research Service (Project # 58-3022-1-001). EG was supported by funding to Verena (viralemergence.org) from the U.S. National Science Foundation, NSF BII 2213854. The content of the information does not necessarily reflect the position or the policy of the federal government.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

Publisher's note

All claims expressed in this article are solely those of the authors and do not necessarily represent those of their affiliated organizations, or those of the publisher, the editors and the reviewers. Any product that may be evaluated in this article, or claim that may be made by its manufacturer, is not guaranteed or endorsed by the publisher.
