A corrigendum on

A global review on locusts (Orthoptera: Acrididae) and their interactions with livestock grazing practices

by Le Gall, M., Overson, R., and Cease, A. (2019). Front. Ecol. Evol. 7:263. doi: 10.3389/fevo.2019.00263

In the published article, there was an error. The genus name of the Australian Plague locust ("Chortoicetes"), was incorrectly replaced in three different places by a different locust genus name "Ceracris." This mistake appeared after the authors submitted the final proofs.

A correction has been made to **Chortoicetes terminifera** (Walker, 1870), [Australian plague locust], [Paragraph 2, 3, and 4]. The following sentences previously stated:

Paragraph 2:

"[*Habitat and ecology. Ceracris terminifera* is distributed throughout the arid and semiarid regions of Australia, which is most of the country, excluding the wetter coastal regions.]"

The corrected sentence appears below:

"[Habitat and ecology. Chortoicetes terminifera is distributed throughout the arid and semi-arid regions of Australia, which is most of the country, excluding the wetter coastal regions.]"

Paragraph 3:

"[Ceracris terminifera are adapted to arid and semi-arid environments with high temporal and spatial variability in precipitation (Hunter et al., 2001).]"

The corrected sentence appears below:

"[Chortoicetes terminifera are adapted to arid and semi-arid environments with high temporal and spatial variability in precipitation (Hunter et al., 2001).]"

Paragraph 4:

"[Ceracris terminifera exhibits behavioral phase polyphenism (Gray et al., 2009), with crowd-reared nymphs increasing activity and propensity to spend time near conspecifics (Cullen et al., 2012).]"

The corrected sentence appears below:

"[Chortoicetes terminifera exhibits behavioral phase polyphenism (Gray et al., 2009), with crowd-reared nymphs increasing activity and propensity to spend time near conspecifics (Cullen et al., 2012).]"

The journal apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

Le Gall et al. 10.3389/fevo.2023.1154640
