Owing to a production error, several dependent variables were omitted from the part of **Table 2** that pertains to Study 1 in the article as originally published. The variables in question are mean diastolic blood pressure, breath rate, C-reactive protein concentration, D-dimer concentration, fasting glucose concentration and plasma potassium concentration. The complete part of **Table 2** that pertains to Study 1 is presented here.

The publisher apologizes for this error. The original article has been updated.
