## KEYWORDS

somapacitan, growth hormone, adult growth hormone deficiency, insulin-like growth factor I, treatment recommendations, pharmacokinetic/pharmacodynamic modelling, long-acting growth hormone

## A Corrigendum on

**Guidance for the treatment of adult growth hormone deficiency with somapacitan, a long-acting growth hormone preparation.**

by Bidlingmaier M, Biller BMK, Clemmons D, Jørgensen JOL, Nishioka H and Takahashi Y (2022) *Front. Endocrinol.* 13:1040046. doi: 10.3389/fendo.2022.1040046.

## Incorrect copyright statement

In the published article, there was an error in the Copyright statement of [Figure 1](#). The statement was incorrectly written as “Reproduced with permission (24).”. The corrected statement is “Reproduced from Bentz Damholt et al. (24) under the CC BY-NC license (<http://creativecommons.org/licenses/by-nc/4.0/>). No changes were made to this figure.”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

**FIGURE 1**  
 Simulated weekly IGF-I SDS levels following dosing with somapacitan (weekly GH [mean dose 2.4 mg]) and somatropin (daily GH [mean dose 0.3 mg]). Dashed line is weekly average IGF-I SDS for somapacitan (-0.09 SDS). Reproduced from Bentz Damholt et al. (24) under the CC BY-NC license (<http://creativecommons.org/licenses/by-nc/4.0/>).
