microRNA, miR-28-5p, myomiRs, sarcopenia, myopathy, Cushing syndrome

A Corrigendum on

Circulating miR-28-5p is overexpressed in patients with sarcopenia despite long-term remission of Cushing's syndrome: a pilot study

by Seco-Cervera M, Ibáñez-Cabellos JS, Pallardo FV, García-Giménez J-L, Aulinas A, Martel-Duguech L, Webb SM and Valassi E (2024). *Front. Endocrinol.* 15:1410080. doi: 10.3389/fendo.2024.1410080

In the published article, there was an error in the **Funding** statement. The funding statement was displayed as “The author(s) declare that no financial support was received for the research, authorship, and/or publication of this article.”. The correct Funding statement appears below.

“The author(s) declare that financial support was received for the research, authorship, and/or publication of this article. This work was supported by a grant from the Instituto de Salud Carlos III (FIS PI21/01223; PI, Elena Valassi), European Regional Development Fund (FEDER) funds.”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
