## KEYWORDS

community engagement, participation intention, long-term sustainability, community water supply business, community water supply business, sustainable development goals

## A Corrigendum on A community sustainability ecosystem modeling for water supply business in Thailand

by Sukma N and Leelasantitham A (2022). *Front. Environ. Sci.* 10:940955. doi: [10.3389/fenvs.2022.940955](https://doi.org/10.3389/fenvs.2022.940955)

In the published article, there was a mistake in the exemption protocol number mentioned in “Section 3.2.4 Data testing and institutional review board,” (MU-CIRB exemption protocol number: 2021/362.1108). The corrected sentence appears below.

“3.2.4 Data testing and institutional review board

This study was classified as low risk and was exempted from the Mahidol University central institutional review board (COE No. MU-CIRB 2021/249.2709), which can be found in the Supplementary Materials section, because it did not record information that could easily identify the subject (direct or indirect/linked).”

In the published article, there was an error in the approval number mentioned in the **Data availability statement**, MU-CIRB 2021/362.1108. The correct Data availability statement appears below.

“The data analyzed in this study cannot be shared publicly because of the Personal Data Protection Act and is managed by the Institutional Review Board of Mahidol University, which authorized the questionnaire and assigned it the approval number COE No. MU-CIRB 2021/249.2709 only.”

The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
