Corrigendum: Mechanism of
Rhinovirus Immunity and Asthma.

Front. Immunol. 12:800020.
doi: 10.3389/fimmu.2021.800020

In the original article, the authors neglected to include the funder Collaborative Research Centre (CRC) 1181 (Erlangen), grant number TP-B08 N to authors Zuqin Yang and Susetta Finotto.

In the original article, there was an error. The scientific meaning of the following sentence was unclear owing to poor syntax: "In asthma, are predominantly induced ILC2 producing type 2 cytokine IL-4, IL-5, IL-13, and IL-9".

A correction has been made to **Innate Immune Response in Asthma, Innate Lymphoid Cells (ILC2), Paragraph 1**. The sentence should read: "In asthma, ILC2 producing type 2 cytokine IL-4, IL-5, IL-13, and IL-9 are predominantly induced".

The same is true of the following sentence: "After RV16 infection, in Tregs were induced both in healthy control and asthmatic subjects with upregulated anti-viral gene expression, such as *IFI44L*, *MX1*, *ISG15*, *IRF* and *STAT1*".

A correction has been made to **Adaptive Immune Response in Asthma, Treg, Paragraph 2**. The sentence should read: "After RV16 infection, Tregs were induced both in healthy control and asthmatic subjects with upregulated anti-viral gene expression, such as *IFI44L*, *MX1*, *ISG15*, *IRF* and *STAT1*".

The authors apologize for these errors and state that they do not change the scientific conclusions of the article in any way. The original article has been updated.
