KEYWORDS

inborn errors of immunity, next generation sequencing, clinical exome sequencing, genetic diagnosis, somatic variant, incidental finding

A corrigendum on

Genetic diagnosis of inborn errors of immunity using clinical exome sequencing

by Kwon SS, Cho YK, Hahn S, Oh J, Won D, Shin S, Kang J-M, Ahn JG, Lee S-T and Choi JR (2023). *Front. Immunol.* 14:1178582. doi: 10.3389/fimmu.2023.1178582

In the published article, there was an error regarding the affiliation for Seung-Tae Lee and Jong Rak Choi. As well as having affiliation 1, they should also have Dxome, Seoul, Republic of Korea.

In the published article, there was an error. In **Materials and Methods**, the manufacturer of our custom panel was missed.

A correction has been made to **Materials and Methods**, "*Genetic analysis and variant interpretation*", paragraph 1. This sentence previously stated:

"For the genetic diagnosis of IEI, we used a custom-designed clinical exome panel including 4,894 genes related to human genetic diseases, including IEI (Supplementary Table S1)."

The corrected sentence appears below:

"For the genetic diagnosis of IEI, we used a custom-designed clinical exome panel (Dxome, Seoul, Republic of Korea) including 4,894 genes related to human genetic diseases, including IEI (Supplementary Table S1)."

Conflict of interest

Authors S-TL and JC were employed by company Dxome.

The remaining authors declare that the research was conducted in the absence of any commercial or financial relationships that could be construed as a potential conflict of interest.

The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
