## A Corrigendum on

### Ocean Circulation Over North Atlantic Underwater Features in the Path of the Mediterranean Outflow Water: The Ormonde and Formigas Seamounts, and the Gazul Mud Volcano

by Mosquera Giménez, Á., Vélez-Belchí, P., Rivera, J., Piñeiro, S., Fajar, N., Caínzos, V., et al. (2019). *Front. Mar. Sci.* 6:702. doi: 10.3389/fmars.2019.00702

In the original article, there was a mistake in **Figure 14** as published. The gray dashed line mentioned in the legend does not appear in the Figure. The corrected **Figure 14** appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

**FIGURE 14 |** Vertical profiles representing the abundance of benthic invertebrates averaged in 2 m bins for all phyla (A), porifera (B), and cnidaria (C) in Formigas seamount. The gray dashed line represents the coefficient between the bottom slope and the angle of propagation of the internal waves ( $\gamma/c$ ).
