KEYWORDS

antioxidant activity, endoplasmic reticulum stress, fermented soybean meal, immunity, *Litopenaeus vannamei*

A Corrigendum on

[Effects of *Bacillus subtilis*-fermented soybean meal replacing fish meal on antioxidant activity, immunity, endoplasmic reticulum stress and hepatopancreas histology in Pacific white shrimp \(*Litopenaeus vannamei*\)](#)

By Chen S, Dai J, Chen Y, Chen Q, Dong F, Wang C, Sun Y, Wang J and Han T (2024) *Front. Mar. Sci.* 11:1449066. doi: 10.3389/fmars.2024.1449066

In the published article, there was an error in [Figure 2](#) and its legend as published. The [Figure 2](#) in the published version lacks the content of [Figures 2H–S](#). The corrected [Figure 2](#) and its legend appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

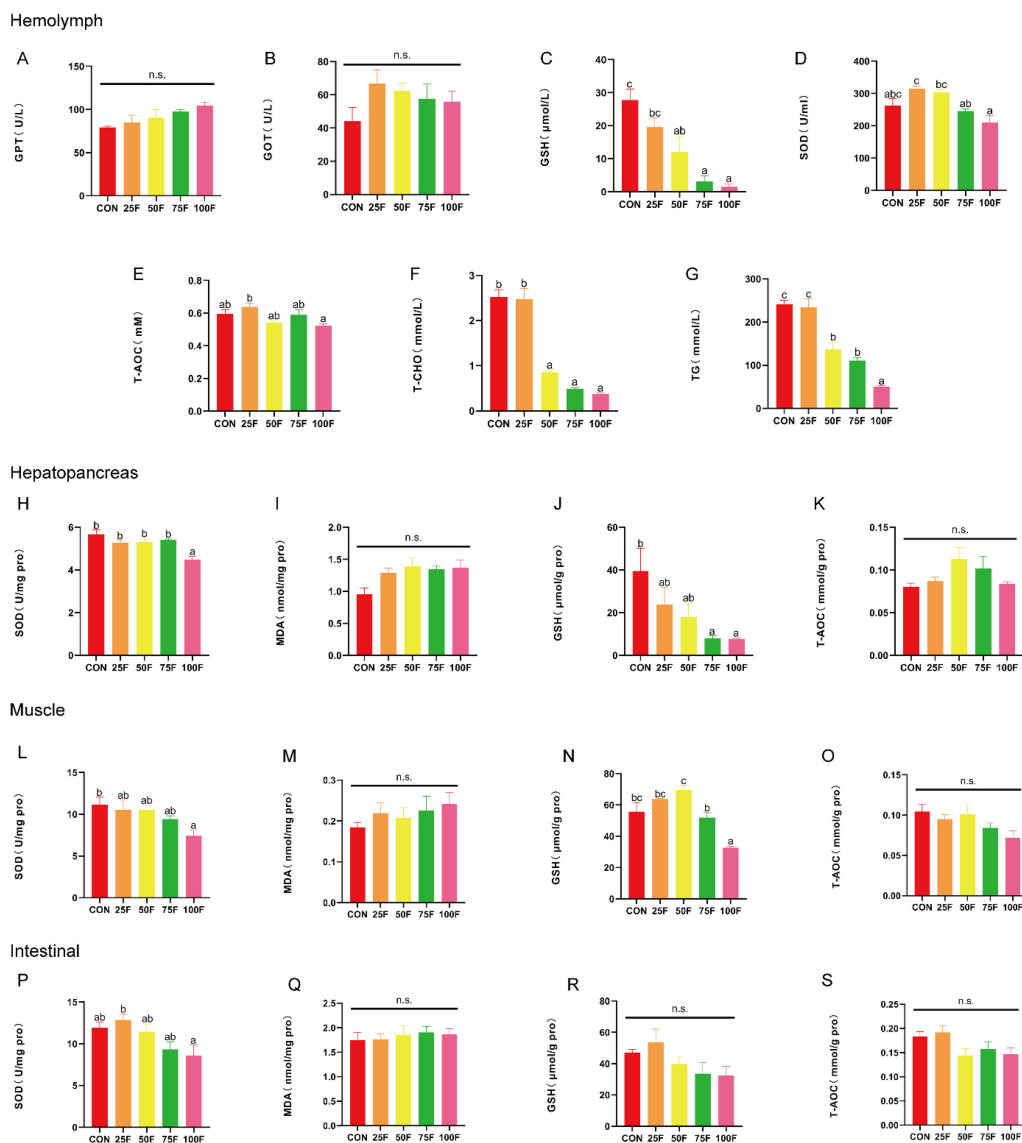

FIGURE 2

The effects of FSBM substitution on the antioxidant indices in different tissues and the contents of T-CHO and TG in the hemolymph ($n = 4$). The results are presented as the mean \pm S. E. M. and were analyzed with Tukey's tests [bars bearing the same letters are not significantly different among treatments ($P > 0.05$)]. The same as below. (A) GPT (glutamic-pyruvic transaminase) activity in the hemolymph; (B) GOT (glutamic oxalacetic transaminase) activity in the hemolymph; (C) GSH (reduced glutathione) content in the hemolymph; (D) SOD (superoxide dismutase) activity in the hemolymph; (E) T-AOC (total antioxidant capacity) activity in the hemolymph; (F) T-CHO (total cholesterol) content in the hemolymph; (G) TG (triacylglycerol) content in the hemolymph; (H) SOD activity in the hepatopancreas; (I) MDA (malondialdehyde) content in the hepatopancreas; (J) GSH content in the hepatopancreas; (K) T-AOC activity in the hepatopancreas; (L) SOD activity in the muscle; (M) MDA content in the muscle; (N) GSH content in the muscle; (O) T-AOC activity in the muscle; (P) SOD activity in the intestinal; (Q) MDA content in the intestinal; (R) GSH content in the intestinal; (S) T-AOC activity in the intestinal. n. s., not significant.
