KEYWORDS

synbiotics, P. vannamei, gut microbiota, 16S rRNA, immune pathways

A Corrigendum on

Deciphering the influence of dietary synbiotics in white shrimp gut and its effects in regulating immune signaling pathways

by Das SP, Abidin Z, Huang H-T, Lin Y-R, Huang C-Y, Wu Y-S, Hu Y-F and Nan F-H (2024) *Front. Mar. Sci.* 10:1342708. doi: 10.3389/fmars.2023.1342708

In the published article, the citation "(Abidin et al., 2022)" was mistakenly not included in the legend of Supplementary Table 4.

The Table legend previously was: "Supplementary Table S4: The final weight, weight gain, specific growth, average daily growth and feed efficiency rate of white shrimp, *P. vannamei* after fed with different experimental feed."

The corrected Table legend is: "Supplementary Table S4: The final weight, weight gain, specific growth, average daily growth and feed efficiency rate of white shrimp, *P. vannamei* after fed with different experimental feed (Abidin et al., 2022)."

A correction has been made to **Materials and methods**, *Experimental design*, Paragraph 1.

This sentence previously stated:

"Here, we prepared six formulated diets with various pre-and probiotic concentrations, as indicated by Abidin et al. (2022), all of which led to differential growth performances (Supplementary Table 1)."

The corrected sentence appears below:

"Here, we obtained six formulated diets with various pre-and probiotic concentrations, as indicated by Abidin et al. (2022), all of which led to differential growth performances (Supplementary Table 1)."

A correction has been made to **Results**, Paragraph 1. This sentence previously stated: "Supplementary Table 4 presents each group's average initial and final weights, weight gain, and specific growth rate."

Das et al. 10.3389/fmars.2025.1603938

The corrected sentence appears below:

"Supplementary Table 4 represents each group's average final weights, weight gain, specific growth rate, average daily growth, and feed efficiency (Abidin et al., 2022)."

A correction has been made to **Discussion**, Paragraph 1. This sentence previously stated:

"However, the feed containing 5 g/kg body weight M. oleifera prebiotics with or without probiotics did not lead to significant growth."

The corrected sentence appears below:

"However, as stated by Abidin et al. (2022) the feed containing 5g/kg body weight *M. oleifera* prebiotics with or without probiotics did not lead to significant growth."

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
