## A corrigendum on Service evaluation of the impact of capnography on the safety of procedural sedation

by Corbett, G., Pugh, P., Herre, J., See, T. C., de Monteverde-Robb, D., Torrejon Torres, R., Saunders, R., Leonard, C., and Prakash, A. (2022). *Front. Med.* 9:867536.  
doi: 10.3389/fmed.2022.867536

In the published article, there was an error.

A correction has been made to the **Conclusion**. This sentence previously stated:

“The incidence of adverse events was significantly reduced by 53.2% ( $p < 0.05$ ).”

The corrected sentence appears below:

“The incidence of adverse events was significantly reduced by 43.2% ( $p < 0.05$ ).”

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
