Dear Readers of *Frontiers in Autonomic Neuroscience*,

As you are all aware, autonomic neuroscience is a multidisciplinary field, in which authors choose a journal based on its perceived impact but, more importantly, on its relevance and readership. Together, the *Frontiers* journals are broad in scope, yet the areas covered by individual journals within the *Frontiers* stable are necessarily narrower. Now, to facilitate your use of the *Frontiers* articles we are going to highlight those articles published in our sister journals that are relevant to us working in autonomic neuroscience.

So, here is a wrap-up of articles you may have missed over the last few months.
