A Corrigendum on:

Prognostic Nomograms for Predicting Overall Survival and Cancer-Specific Survival of Patients With Early Onset Colon Adenocarcinoma

By Jin H, Feng Y, Guo K and Ruan S (2020). *Front. Oncol.* 10:595354. doi: 10.3389/fonc.2020.595354

In the original article, there was a mistake in “**Figure 2** | OS and CSS associated nomograms for EOCA patients” as published. The contents of **Figure 2** and **Table 3** (including labels and data) correspond to each other, and there are no errors in **Table 3**. When we ran the code in the R software and exported **Figure 2**, some of the labels were not displayed completely and were manually added later. Due to our negligence, the gastric cancer stage “T1, T2, T3, T4a, T4b” was entered as “T1a, T1b, T2, T3, T4”. The corrected “**Figure 2** | OS and CSS associated nomograms for EOCA patients” appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
