## A Corrigendum on

### Long Noncoding RNA NONHSAT079852.2 Contributes to GBM Recurrence by Functioning as a ceRNA for has-mir-10401-3p to Facilitate HSPA1A Upregulation

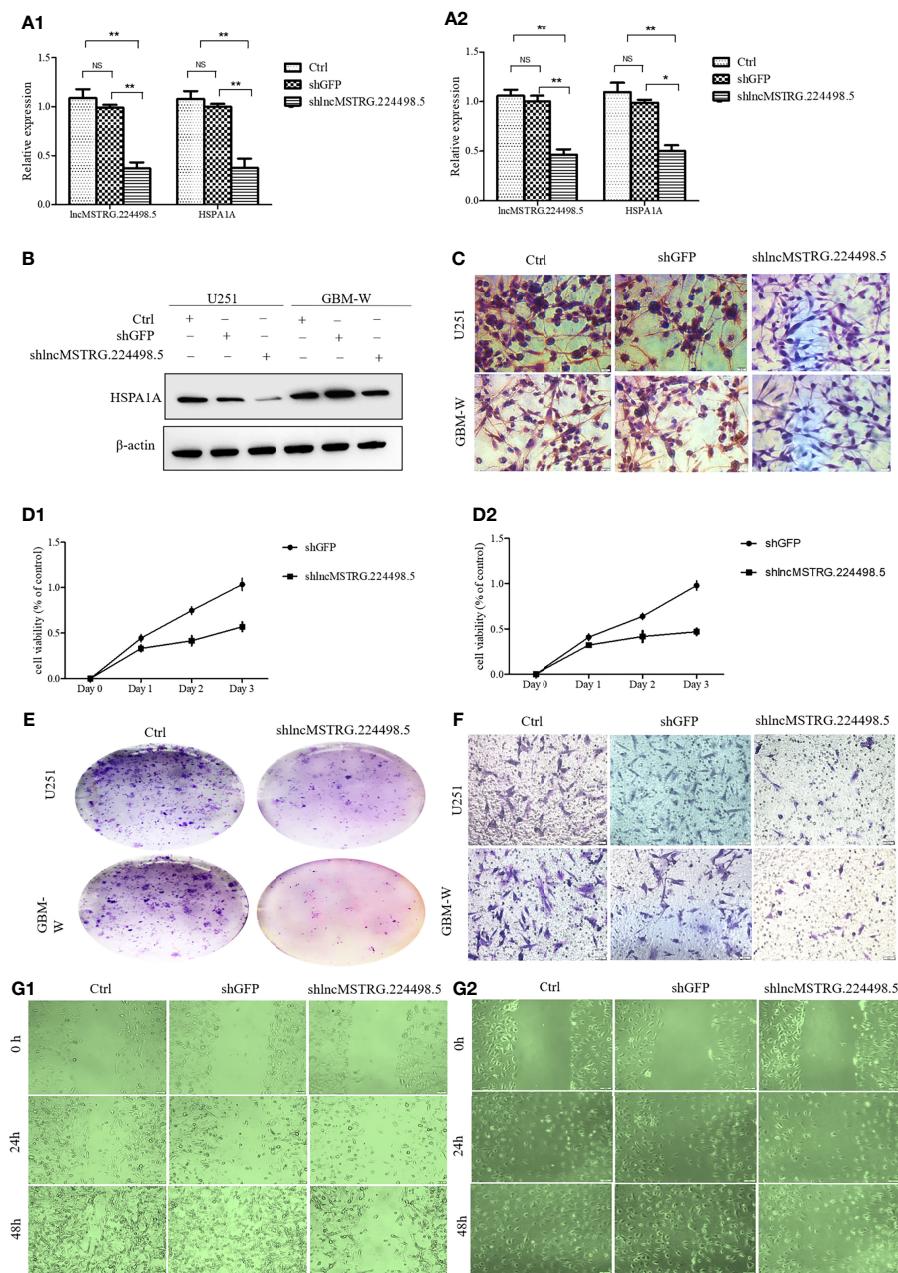

By Zhao N, Zhang J, Zhao L, Fu X, Zhao Q, Chao M, Cao H, Jiao Y, Hu Y, Chen C, Wang L and Wang H (2021). Front. Oncol. 11:636632. doi: 10.3389/fonc.2021.636632

In the original article, there were mistakes in **Figure 4** as published. Due to carelessness, we put the wrong picture of **Figure 4B**, we initially planned to use the results of the third repeated experiment as a representative picture, but in the end we put the picture of the first experiment here. The picture for "shGFP" group in **Figure 4C** and **F** were duplication of the images for "Ctrl" group. We had double checked the original data and found that the errors were caused by our carelessness in exporting the representative images and compiling these figures. The corrected **Figure 4** appears below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
