A corrigendum on

[Progress and perspectives of perioperative immunotherapy in non-small cell lung cancer](#)

by Peng Y, Li Z, Fu Y, Pan Y, Zeng Y, Liu J, Xiao C, Zhang Y, Su Y, Li G and Wu F (2023)
Front. Oncol. 13:1011810. doi: 10.3389/fonc.2023.1011810

In the published article, two figures (1 and 2) were accidentally omitted but were subject to peer review and included in the original submission. The figures and respective citations have been added to the original article. Figure 1 has been cited at the end of **1 Introduction** and Figure 2 has been cited at the end of the **6 Discussion**. The missing figure and their captions appear below.

The authors apologize for this error and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.

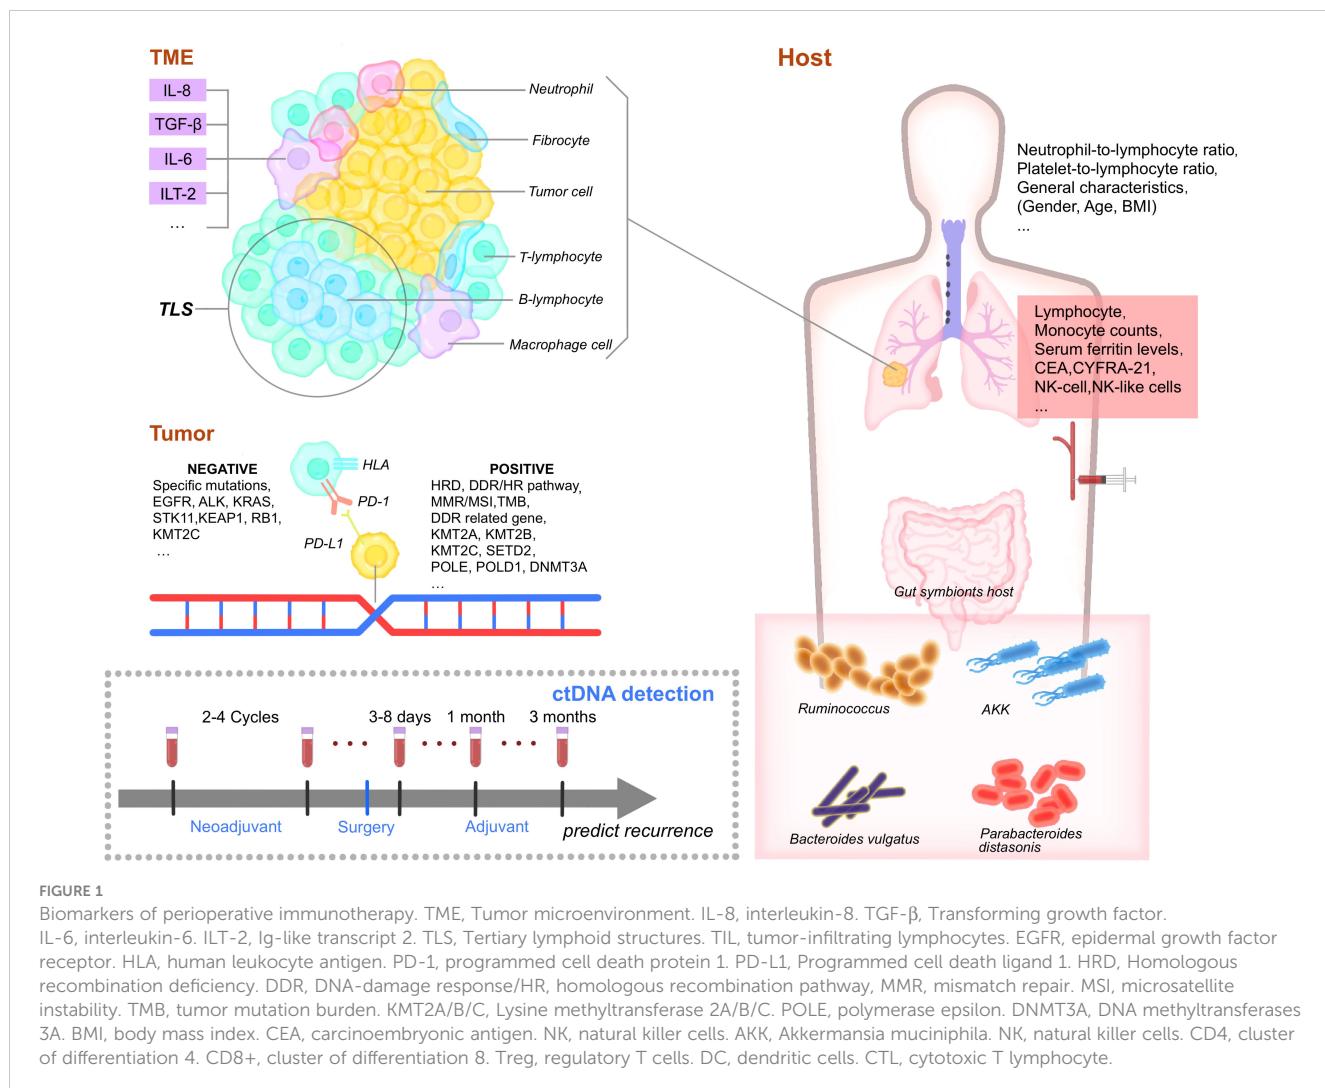

FIGURE 1

Biomarkers of perioperative immunotherapy. TME, Tumor microenvironment. IL-8, interleukin-8. TGF- β , Transforming growth factor receptor. HLA, human leukocyte antigen. PD-1, programmed cell death protein 1. PD-L1, Programmed cell death ligand 1. HRD, Homologous recombination deficiency. DDR, DNA-damage response/HR, homologous recombination pathway. MMR, mismatch repair. MSI, microsatellite instability. TMB, tumor mutation burden. KMT2A/B/C, Lysine methyltransferase 2A/B/C. POLE, polymerase epsilon. DNMT3A, DNA methyltransferases 3A. BMI, body mass index. CEA, carcinoembryonic antigen. NK, natural killer cells. AKK, Akkermansia muciniphila. NK, natural killer cells. CD4, cluster of differentiation 4. CD8+, cluster of differentiation 8. Treg, regulatory T cells. DC, dendritic cells. CTL, cytotoxic T lymphocyte.

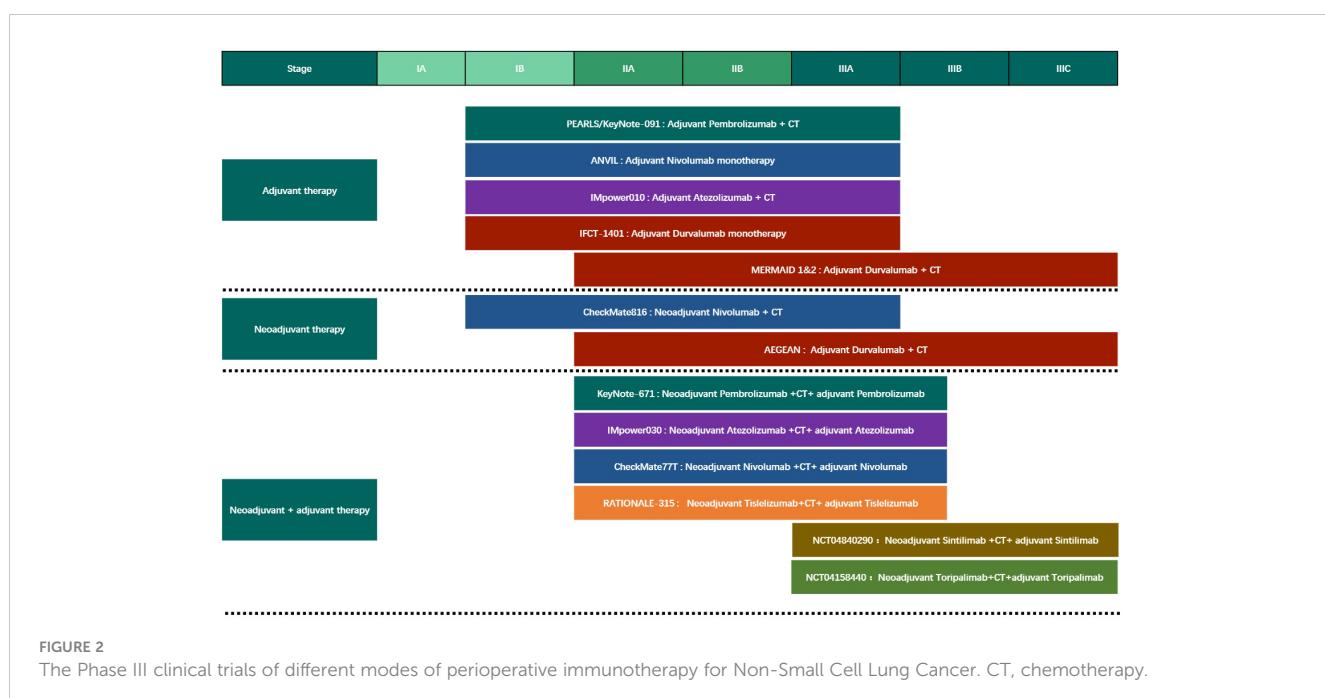

FIGURE 2

The Phase III clinical trials of different modes of perioperative immunotherapy for Non-Small Cell Lung Cancer. CT, chemotherapy.
