A Correction on

Quality of life and associated factors among patients with cancer receiving chemotherapy at Dessie Comprehensive Specialized Hospital, North-East Ethiopia: a cross-sectional study

By Bayked EM, Yimam MG, Yalew ZM, Toleha HN and Zewdie S (2024). *Front. Oncol.* 13:1288166. doi: 10.3389/fonc.2023.1288166

In the published article, under the methods subsection, i.e., data processing and analysis, “Equation 6” is not correct, which was:

$$\text{“Mean } QLQ_{C30} \text{ summary score”} = \frac{\sum(\text{Functional scales}) - \sum(100 - \text{symptom scales})}{13}$$

The error happened because we accidentally used the “minus” sign instead of the “plus” sign, although we applied the correct computation to calculate the mean QLQ_{C30} summary score.

The correct formula is:

$$\begin{aligned} \text{“Mean } QLQ_{C30} \text{ summary score”} \\ = \frac{\sum(\text{Functional scales}) + \sum(100 - \text{symptom scales})}{13} \end{aligned} \quad (6)$$

The original version of this article has been updated.
