Reason for Corrigendum:

In the original review, we placed an incorrect citation in the following sentence:
“Also, salvinorin A can act as a “punisher” to self-administration of cocaine or a short-acting MOPr agonist in primates (when given contingently; Whitfield et al., 2015).”

The correct sentence and citation are as follows:

“Also, salvinorin A can act as a “punisher” to self-administration of cocaine or a short-acting MOPr agonist in primates (when given contingently; Freeman et al., 2014).”

The authors apologize for the mistake. This error does not change the scientific conclusions of the review.
