A corrigendum on

Two Consecutive Days of Extreme Conditioning Program Training Affects Pro and Anti-inflammatory Cytokines and Osteoprotegerin without Impairments in Muscle Power
by Tibana, R. A., de Almeida, L. M., Frade de Sousa, N. M., Nascimento, D. d. C., Neto, I. V. d. S., de Almeida, J. A., et al. (2016). Front. Physiol. 7:260. doi: 10.3389/fphys.2016.00260

The final sentence in the legend of Figure 3 has been reworded to explicitly state the significance of the symbols. $^{*}p < 0.05$ comparing to Pre T1; $^{\dagger}p < 0.05$ comparing to Post T1; $^{\ddagger}p < 0.05$ comparing to 24 h Post T1. This clarification does not change the scientific conclusions of the article in any way.

The original version of the article has been updated following the highlighting of issues by a third party.
