## A Corrigendum on

**Calliterpenone, a natural plant growth promoter from a medicinal plant *Callicarpa macrophylla*, sustainably enhances the yield and productivity of crops.**

by Pandey P, Pandey SS, Awasthi A, Tripathi A, Singh HP, Singh AK, Tandon S and Kalra A (2022) *Front. Plant Sci.* 13:960717. doi: 10.3389/fpls.2022.960717

In the published article, there was an error in the legend for **Figure 1**: “Structure of calliterpenone and gibberellic acid”. The corrected legend appears below. There was also an error in **Figure 1**, Abbeokutone was mislabelled as “Gibberellic acid”.

The corrected **Figure 1** appears below.

In the published article, a compound name was misspelled in the Introduction. [“abeoketone”]. This sentence previously stated: “Calliterpenone (16 $\alpha$ , 17-dihydroxy phyllocladane-3-one) (**Figure 1**), has a similar substitution pattern similar to the ent-kauranoid compound “abeoketone” (16 $\alpha$ , 17-dihydroxy kaurane-3-one), the precursor of gibberellins in the biosynthetic pathway (Liu et al., 2003; Bottini et al., 2004).”

The correct sentence appears as follows:

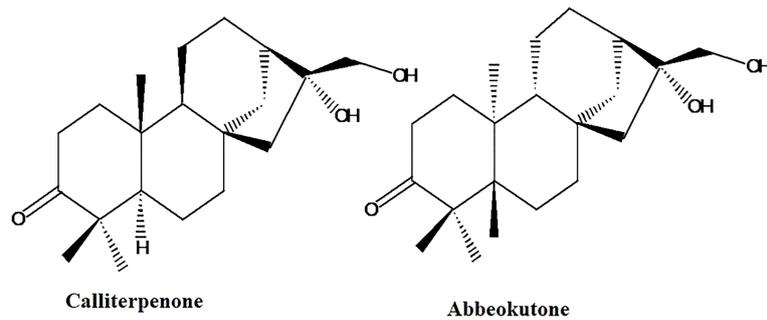

FIGURE 1  
Structure of calliterpenone and abbeokutone.

“Calliterpenone (16 $\alpha$ , 17-dihydroxy phyllocladane-3-one) (Figure 1), has a similar substitution pattern similar to the entkaurenoid compound “abbeokutone” (16 $\alpha$ , 17-dihydroxy kaurane-3-one), the precursor of gibberellins in the biosynthetic pathway (Liu et al., 2003; Bottini et al., 2004).”

The authors apologize for these errors and state that this does not change the scientific conclusions of the article in any way. The original article has been updated.
